The training is directed to Basic (primary) level teachers. Secondary level teachers are invited to attend only if they also teach at primary level.

Please note that budget item provides for sets of Readers (144 titles printed A3 size for classroom use) to be supplied to 11 schools at a cost of US\$800 per set. These will be supplied to all schools with more than 3 teachers. These will be available for use in schools after the training by 82% of teachers at an average cost of \$127.50 per teacher.

The average cost of supply of readers to the remaining five schools would be \$266.70 per teacher. As a cost-saving measure for the project, these additional sets will be supplied only if the funds remain available from the contingency.

Arrangements for sharing reader sets between schools have been considered, but this would be logistically difficult.
